

# SCiM LAB PROGRAMMES AND STRATEGIC PLAN

Overview for Programmes Coordination  
By Henry Kofi Danso

## Introduction

The **Smart Cities and Manufacturing Lab (SCiM-Lab)** at TCC-CIMET, KNUST, focuses on developing innovative and smart solutions for urban development and industrial transformation. Currently in the conceptual phase, the lab's research areas include the application of frugal innovation in advanced manufacturing, covering fields such as additive manufacturing, robotics, and Industry 4.0 technologies.

The implementation of SCiM-Lab is being carried out through several key initiatives. The Living Lab allows for:

As Programmes Coordinator, my role involves the planning, coordination, and successful delivery of SCiM LAB's projects and initiatives, ensuring alignment with our strategic objectives.

## Projects Accomplished

### *SHELLS OF ELEGANCE 1.0*

*The Organic Cube is an innovative, cube-shaped structure that utilizes spatial intelligence to create an emotional space for relaxation, contemplation, and self-reflection.*

### Key Outputs and Achievements

*The Organic Cube's design is rooted in natural, organic forms, evoking a sense of fluidity and calmness. This is a varied and simple structure that explores the potential of laths through a detailed study of form and light,*

engaging the viewer. The structure demonstrates the versatility of laths by creating an interactive experience that changes with the viewer's movement. It emphasizes the interplay of light and form, inviting exploration and interaction.

Partnerships and Impact

Individuals, Industry, and Academic collaborations

The SCiM LAB has had significant impact across various sectors, contributing to advancements in smart technologies and manufacturing processes. Moving forward, we are focused on expanding our research capabilities, strengthening industry partnerships, and creating educational opportunities for the next generation.

## Upcoming Projects

### 1. SHELLS OF ELEGANCE 2.0

*Buidling the 1:1 (Human-scale) Organic Cube is an innovative, cube-shaped structure that utilizes spatial intelligence to create an emotional space for relaxation, contemplation, and self-reflection.*

### 2. BOAFO YENA

*The Multi-purpose Solution to Load Carriage. The device would be equipped with sensors to measure key parameters such as weight, distance traveled, and waiting time.*

### 3. MƆFIALA: THE BROWN CANE

*The Multi-purpose Solution to Load Carriage. The device would be equipped with sensors to measure key parameters such as weight, distance travelled, and waiting time.*

### 4. AMANE3BƆ

*The platform's design centers on turning archived Hansard pages into trustworthy, multilingual, multi-modal civic outputs by combining robust extraction, precise semantic search, and a staged RAG/RAFT generation strategy.*

### 5. MATERNITY CONNECT

*Connecting pregnant women with professional midwives for better maternal care.*

### 6.0 POINT

*Popular -To-Popular Transport Realities in Rwanda and Ghana*

# SCiM LAB COMMUNICATION STRATEGY

Website and Social Media Plan

## Website Development

The SCiM LAB website will serve as a central hub for all lab-related activities, outputs, and information. Its primary purpose is to enhance visibility, reinforce branding, and facilitate knowledge dissemination. Strategically, it aims to be the go-to resource for stakeholders interested in the lab's work.

The website should serve as a central repository for information regarding SCiM Lab activities and research. This allows easy access for interested parties and ensures an accessible source of truth.

## Proposed Website Structure

The website will include the following core sections:

- **About SCiM LAB:** Vision, team profiles, and facility descriptions.
- **Projects:** Detailed information on completed, ongoing, and upcoming projects.
- **Publications:** Peer-reviewed articles and published research by members of the lab
- **News:** Latest news from the lab, including new hires, awards and research.
- **Events:** Calendar of workshops, seminars, and public events.
- **Partnerships:** Showcase partnerships and collaboration opportunities.

## Implementation Approach

The website will be developed using a streamlined process, including:

- **Content Development and Approval:** Establish a clear workflow for creating, reviewing, and approving website content.
- **Design:** Ensure the site has a modern aesthetic, is easy to use, and represents the lab's brand.
- **Hosting:** Choose a reliable hosting provider to ensure uptime and security.
- **Maintenance:** Ongoing maintenance to fix security issues, add features and address any outages.

## Expected Outcomes

The website is expected to deliver:

- Increased engagement and collaboration with external partners.
- Improved access to lab information for researchers, students, and the public.

## Social Media Strategy

The SCiM LAB will establish a social media presence to broaden its outreach, enhance visibility, and engage with stakeholders. These platforms will promote projects, events, and achievements.

## Proposed Platforms

The SCiM LAB should utilise the following social media platforms:

- **LinkedIn:** [www.linkedin.com/in/scimlab360](https://www.linkedin.com/in/scimlab360)
- **X/Twitter:** [@Scimlab\\_360](https://twitter.com/Scimlab_360)
- **Instagram:** [@scim\\_lab](https://www.instagram.com/scim_lab)

## Content Strategy

The content strategy should focus on:

- **Research Highlights:** Sharing key findings and insights from lab projects.
- **Project Updates:** Providing regular updates on the progress of ongoing projects.
- **Events:** Promoting upcoming workshops, seminars, and conferences. Sharing recordings of previous events.
- **News:** Sharing positive news and achievements with the audience.

## Next Steps

- Finalize the website content and structure.
- Complete Shells of Elegance 2.0
- Develop a content calendar for both the website and social media.
- Establish metrics to measure the success of the digital strategy.
